

Phytoplankton composition in Utö

Sanna Suikkanen 18.8.2015

SS3 Utö (Lat 59.56539, Lon 21.36177) 16.8.2015

Dominant taxa:

Aphanizomenon flos-aquae

Nodularia spumigena

Dolichospermum spp.

Nitzschia paleacea

Heterocapsa triquetra

Surface water temperature 17.9 °C and chl *a* concentration 3.9 µg/L. Filamentous cyanobacteria still dominate the community, with lots of *Nitzschia paleacea* attached. Some dinoflagellates also present: e.g. *Heterocapsa triquetra*, *Glenodinium* and *Gymnodinium* spp.
